The conditions of conservation are optimal when the Oil is preserved in a full and closed packing away from Light at a temperature below 18°C.

Best before date

24 months as from the date of manufacture, in the original Closed packing and in the recommended conditions.

Flow chart of production

COMPOSANTS

Polyunsaturated fatty acids:

Linoleic acid (Vitamin F, Omega 6)..... 58 to 64 %

Lipid replenishing, (reduces water loss)
Preservers the elasticity
Anti-stretch
Soothing
Feeding
Healing

Monounsaturated fatty acids:

Oleic acid (omega 9) 22 to 23 %

Moisturizer

Saturated fatty acids:

Palmitic acid 11 to 12 %

Moisturizer participates in the composition of sebum.

Stearic acid 4 %

Moisturizer

Sterols (beta-sitosterol, campesterol, Stigmasterol)

Total sterols 10 g/kg

Regenerating, revitalizing

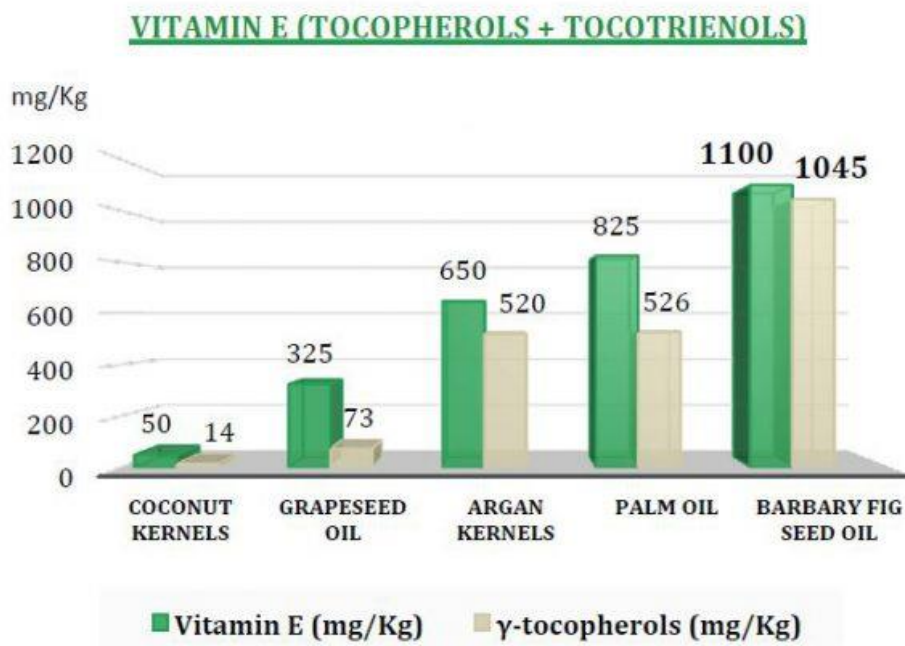

Vitamin E (tocopherols and tocatriénols)

Vitamin E 1 g/kg

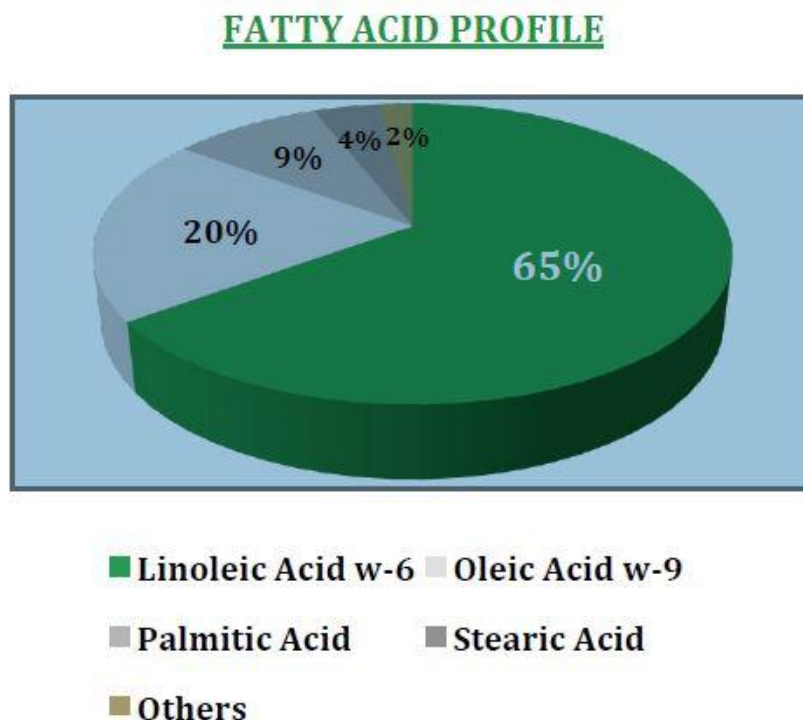

Anti-oxidant, anti-wrinkle

What's the Big Deal?

Prickly pear seed oil is very rich in vitamin E (~1100 mg/Kg) of which 95 % are the powerful and coveted gamma- tocopherols. This high tocopherol content makes this oil an extremely powerful anti-oxidant in comparison to other popular oils.

This gorgeous oil is also doubly concentrated in essential fatty acids: Omega 6 (about 65% linoleic acid) Omega 9 (about 20% oleic acid) compared to other oils.

The powerful combination of fatty acids and tocopherols makes Prickly Pear Seed Oil unique in its ability to deliver a high concentration of beneficial nutrients to the skin. This oil is slightly viscous and non-greasy making skincare formulations easy and effective.
